Press release

VINCI Energies acquires Bosman Bedrijven

VINCI Energies completes its offer in Building Solutions with the acquisition of Bosman Bedrijven which, thanks to innovative approaches such as BIM modelling, guarantees comfortable, efficient and sustainable living and working environment.

On December 6th, VINCI Energies, a subsidiary of the VINCI Group, specialising in energy and information and communication technology (ICT), closed a deal to acquire Bosman Bedrijven. Bosman Bedrijven delivers and manages technical solutions for a comfortable and sustainable living and working environment. Their expertise focuses on design, installation and management of mechanical, sanitary and electrical installations in non-residential construction. Bosman Bedrijven operates with a multidisciplinary approach to projects, such as the office building The Edge on the Zuidas (Amsterdam), as well as the technical management and maintenance of technical installations. Bosman Bedrijven is located in Amersfoort and Rotterdam. In 2018, Bosman Bedrijven expects a turnover of € 44 million. This acquisition will allow VINCI Energies in the Netherlands to increase its turnover in Building Solutions.

Peter Derks, Deputy Managing Director of VINCI Energies in the Netherlands says: *"The expertise of Bosman Bedrijven in building projects and their innovative approach with Building Information Modelling (BIM) for designing buildings and Building Research Establishment Environmental Assessment (BREEAM), for calculation of the sustainability of buildings, is complementary to our existing portfolio. In addition, the decisive and entrepreneurial culture of Bosman Bedrijven fits well with the culture of VINCI Energies."*

Hans van Dijk, Director of Bosman Bedrijven: *"Since our transition in 2012, we have developed from a production-oriented organization to a knowledge and management company, all our strategic and financial objectives have been realized. With a well-filled order book with very appealing projects, the company is ready for the next step. By joining a strong parent organization that wants to retain our identity and way of working, we can make a major step forward for our customers and employees."*

The transaction will be submitted to the Authority for Consumers & Markets (ACM) and is expected to be completed in January 2019.

About VINCI Energies

Connection, performance, energy efficiency, data. In a constantly changing world, VINCI Energies is picking up the pace of rolling out new technologies to make two major changes a reality: the digital transformation and energy transition. With its strong local presence and agile organisational structure, VINCI Energies, through its business units, is making energy, transport and communication infrastructure, as well as manufacturing plants and buildings, more reliable, safer and more efficient day by day.

2017: €10.8 billion (revenue) // 69,400 employees // 1,600 business units // 53 countries
