VINCI Energies is awarded the PPP of Kiel University's new Faculty of Agricultural Sciences in Germany

- **A €50 million public-private partnership (PPP)**
- **33 months of works followed by 25 years of operation**

VINCI Energies has signed a PPP contract with the Land of Schleswig-Holstein covering design, construction and operation of the new Faculty of Agricultural and Nutritional Sciences in Kiel.

The new building, an 11,000 sq. metre, six-storey facility, will be located on Christian-Albrecht University campus, houses six institutes and includes offices for an IT centre. The locations will be flexible so that they can be easily rearranged to accommodate evolving requirements.

The 33 months works phase encompasses design and construction of the building, redeveloping the outdoor areas and delivery dock, connecting the laboratory units and equipping them entirely.

The design aims to achieve high environmental performance standards on the BNB assessment system for sustainable buildings, managed by the German Ministry of the Interior, Building and Community.

The operation phase will begin in April 2024 and last 25 years. It covers in particular maintenance, inspections, repairs, upkeep, cleaning, winter management, concierge services, energy management and 24-hour assistance.

VINCI Energies has worked on about 20 PPPs in Germany since 2004.

About VINCI Energies

In a world undergoing constant change, VINCI Energies focuses on connections, performance, energy efficiency and data to fast-track the rollout of new technologies and support two major changes: the digital transformation and the energy transition. With their strong regional roots, agile and innovative, VINCI Energies' business units boost the reliability, safety, sustainability and efficiency of energy, transport and communication infrastructure, factories, buildings and information systems.

2020 : €13,7 billion // 83.800 employees // 1.800 Business Units // 55 countries
